## STATEMENT OF ORIGINALITY

This undergraduate thesis is my original work and all information contained in this project paper which is derived from the work of others had been given an award by citing the name of the source's author correctly. All the contents of this undergraduate thesis are the responsibility of the author thoroughly.

Name : Utomo Hendra Saputra

NIM : 1112002021

Signature :

Date : September 14, 2017

## STATEMENT OF APPROVAL

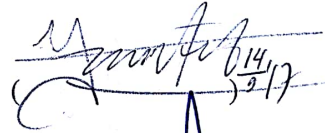

This Undergraduate Thesis is prepared and presented by:

Name : Utomo Hendra Saputra  
NIM : 1112002021  
Study Program : Information System  
Title : MAJORIO: A Web Based Application For Determining Course At Bakrie University Using Fuzzy Analytical Network Process (Fanp) And Technique For Order Preference By Similarity To Ideal Solution (Topsis)

**Has been approved by the Board of Examiners and accepted as a partial fulfillment of the requirements for Undergraduate Degree in Information System, Bakrie University.**

### BOARD OF EXAMINERS

Supervisor I : Guson Kuntarto, ST, Msc

(  )  
14/11/17

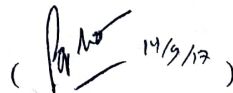

Supervisor II: Gun Gun Gumilar, S.Kom., MMSI

(  )  
15/10/2017

Examiner I : Dr. Siti Rohajawati, S.Kom., M.Kom

(  )

Examiner II : Boy Iskandar Pasaribu, S.Kom, MIS, MIT

(  )  
14/9/17

## ACKNOWLEDGEMENT

The greatest thankfulness and praises are conveyed to Allah SWT for all the endless blessing and mercy that the author could finish this undergraduate thesis with the title “MAJORIO: A Web Based Application for Determining Course at Bakrie University using Fuzzy Analytical Network Process (FANP) and Technique for Order Preference by Similarity to Ideal Solution (TOPSIS)”. This final project is submitted as the partial fulfillment of the requirement for the Undergraduate Degree (Strata 1) of Information System at Bakrie University.

I would like to express my sincere appreciation to the following individuals for their contribution to help the author on order to complete all the writing process, i.e.:

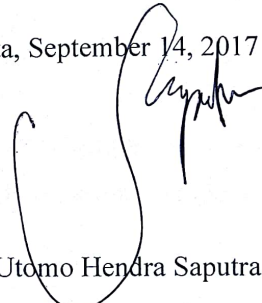

1. My awesome supervisors Mr. Guson Kuntarto and Mr. Gun Gun Gumilar for their precious guidance, wisdom, and everlasting patience and support throughout the preparation of this undergraduate thesis. Despite of their tight work schedule, they always had time for discussion and deliberation of the various things related to this research although the author had so many issues to understand the theory for this research.
2. I also extend my sincere gratitude to Mrs. Siti Rohajawati and Mr. Boy Iskandar Pasaribu for their inputs, feedback and guidance in breaking obstacle in doing the analysis and the simulation of this research.
3. My special gratitude is also dedicated to my beloved parents, Papa Sarimun and Mama Umi Kursiyah, for their amazing support and many prays of their many nights for the success of their son also for my sister Ayu Dwi Lestari for being supportive.
4. Special thanks to Bastian Saputra (Hudzaifah), Vivid A. Chairunissa, Maya Avinda, Evilda Astriansa, Nahda Rizqi M, Ishadi Fauzan and all my Thesis war team for all the support from the beginning of this research till the end and also for being my best friend for over 6 years and made my

campus life sparkly, and my big family SIF 2011 for all the inputs and helps.

5. Last but not least, I also extend my gratitude for myself who is so tough and always keep the spirit on so I can finish this undergraduate thesis despite of any problem happened during finishing this work.

Lastly, I hope that God Almighty is pleased to reply for all the good of all those who has helped. Hopefully, this undergraduate thesis brings benefit to the other parties who need.

Jakarta, September 14, 2017

STATEMENT OF APPROVAL OF UNDERGRADUATE THESIS FOR  
ACADEMIC PURPOSES

As an academic community of Bakrie University, I who assigned below:

Name : Utomo Hendra Saputra  
NIM : 1112002021  
Study Program : Information System  
Type of Thesis : Implementation Research

For the development of science, agreed to grant Bakrie University non-exclusive Royalty-Free Rights (non-exclusive, Royalty-Free Rights) for my undergraduate thesis, entitled:

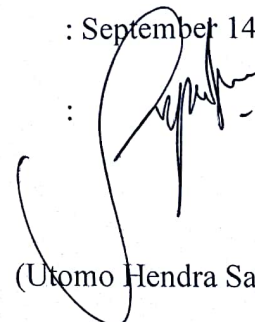

**MAJORIO: A Web Based Application for Determining Course at Bakrie University using Fuzzy Analytical Network Process (FANP) and Technique for Order Preference by Similarity to Ideal Solution (TOPSIS)**

With the non-exclusive Royalty-Free Rights, Bakrie University is holding rights to keep, avert media/format, manage database, maintain, and publish my final assignment as far as my name as author/creator and owner of Copyright is mentioned.

Prepared in : Jakarta Selatan

Date : September 14, 2017

**ABSTRACT**

In selecting course at University, graduated students from high school rarely exposed with the information regarding with the courses offered. This lack of information about university's courses may lead to a problem which student may choose course that less preferences. This research aims to design and develop a Decision Support System (DSS) that can be used to assist students in selecting preferable course according to their interests and talents. The DSS named Majorio. The system build according to the curriculum 2013 and multiple information theories. Majorio is developed using combination of two algorithms/functions: Fuzzy Analytical Network Process (FANP) and Technique for Order Preference by Similarity to Ideal Solution (TOPSIS). This combined function is used to calculate a combination of talents and academic competence and analyze how far the individual match against course. The methodology used in the development of Majorio is Web Methodology Language. This requires five stages including : requirement analysis, conceptual modelling, implementation, testing and implementation, deployment. Since Majorio is a web-based application, it will be accessed in majorio.org. Majorio is developed using PHP as a medium for data access which is supported by Apache web service while Javascript is used as a criterion calculating machine on the client side. The results of this study are 10 criteria used in determining the course, Majorio DSS design formed into Unified Modeling Language (UML), and Comparison ranking between Fuzzy ANP and Fuzzy ANP TOPSIS resulting in calculation of Fuzzy ANP TOPSIS more accurate than Fuzzy ANP. In summary, the analysis of study show that 80% respondent students agree that Majorio can help them in selecting preferable course according to their interests and talents

Keywords : FANP, TOPSIS, DSS, Majorio, WebML
